WHY CADAC REGULATORS?

To maximise safety, all **Cadac cylinder regulators** are factory fitted with a crimped 85cm hose and **QR fittings**.

The added safety feature of an **Excess Flow Valve (EFV)** comes as standard.

EFV is an automatic hose safety feature that cuts off 90% of gas flow if the hose is compromised.

The **QR fitting** acts to stop gas flow if the joint is disconnected from the BBQ.

All Cadac regulators come with these additional safety features as standard.

Propane POL O/F Regulator QR
8518-FL-QR

- Overflow/level indicator allows visual gas level monitoring and convenient leak testing
- UK Male POL (105) 5/8" LH
- Operating Pressure: 37 mbar

Propane Clip-On O/F Regulator QR
8516-FL-QR

- Overflow/level indicator allows visual gas level monitoring and convenient leak testing
- Inlet size 27mm
- Operating Pressure: 37 mbar

CG Overflow Regulator QR
8515-FL-QR

- Overflow/level indicator allows visual gas level monitoring and convenient leak testing
- Operating Pressure: 28 mbar

Butane Clip-On O/F Regulator QR
8517-FL-QR

- Overflow/level indicator allows visual gas level monitoring and convenient leak testing
- Inlet size 21mm
- Operating Pressure: 28 mbar
